

REMARKS

Claim 1 is amended to change the “n” in formula (8) to an “m.” There is no substantive change to the claim.

The amendment to the paragraph bridging pages 3-4 of the present specification changes the “n” in formula (8) to an “m” to correct an obvious typographical error (the formula referred to “n” but the paragraph referred to “m”). Applicants note that the Examiner also observed this typographical error when making the Examiner’s Amendment of November 17, 2009 and amended the paragraph to refer to “n” rather than “m” (the flip-side of the present amendment). However, Applicants respectfully amend the paragraph to instead refer to “m.” Support for this amendment may be found in the original paragraph of the present specification. Applicant notes that this change is not substantive in nature.

The paragraphs on pages 13 and 16 are amended to correct a typographical error. The word “pyroryl” that appears in the original specification is amended to recite “pyrrolyl.”

The changes being made are simply editorial in nature and no question of new matter or questions of further search arise.

Entry and consideration of this Amendment are respectfully requested.

Respectfully submitted,
